Question: Bid states 3900 CY of soil for excavation and landfill/treatment. Are all bidders to assume 5850 tons for these activities? Should bidders provide a unit rate for excavation and landfill/treatment?

Answer: Provide bid based on 5850 tons; however, you should also include a unit rate.

Question: Will Commerce adjust the cap downward for quantities excavated less than the 3900 CY (5850 tons)?

Answer: Commerce will adjust the cap as necessary depending on the actual tonnage excavated.

Question: Should all bidders assume 5 wells to be replaced?

Answer: Yes. Any well that is in the area of excavation shall be replaced.

Question: Bid requests monitoring of the new well network. Is it correct to assume this includes 12 wells and 4 piezometers?

Answer: Yes.

Question: Will Commerce require continuous characterization and/or sampling of the soils for the installation of the new wells/replacement wells?

Answer: No
